

## **Annex 5 – Decree on Landscape Park Strunjan**

The unofficial consolidated version of the Decree on Landscape Park Strunjan comprises:

- The Decree on Landscape Park Strunjan (Official Gazette of the Republic of Slovenia [*Uradni list RS*], No. 107/04 of 1 October 2004),
- Corrigendum to the Decree on Landscape Park Strunjan (Official Gazette of the Republic of Slovenia [*Uradni list RS*], No. 114/04 of 22 October 2004),
- Decree Amending the Decree on Landscape Park Strunjan (Official Gazette of the Republic of Slovenia [*Uradni list RS*], No. 83/06 of 4 August 2006),
- Decree Amending the Decree on Landscape Park Strunjan (Official Gazette of the Republic of Slovenia [*Uradni list RS*], No. 71/08 of 14 July 2008),
- Decree Amending the Decree on Landscape Park Strunjan (Official Gazette of the Republic of Slovenia [*Uradni list RS*], No. 77/10 of 4 October 2010),
- Act Amending the Nature Conservation Act ZON-C (Official Gazette of the Republic of Slovenia [*Uradni list RS*], No. 46/14 of 23 June 2014).

### **DECREE on Landscape Park Strunjan**

#### I. GENERAL PROVISIONS

##### **Article 1 (Purpose and Objectives of Protection)**

(1) With the purpose of protecting natural values and preserving biodiversity and landscape diversity, the area of the Strunjan peninsula is established as Landscape Park Strunjan (hereinafter: the Park).

(2) The Objectives of protection are: preserving natural values; preserving maximum biodiversity; preserving populations of endangered and internationally protected wild plant and animal species (hereinafter: the plant and animal species); preservation of the existing volume of habitat types at the very least, which are maintained at a favourable status as a matter of priority; preservation of the landscape with the mosaic distribution of landscape structures; and preservation of the ecological characteristics of the salt pans, the lagoon and the seashore, and the natural processes and connections between the splash zone, the intertidal zone and the infralittoral.

##### **Article 2 (Content)**

(1) This Decree defines the area of the Park, the area of the narrow protected areas within the Park, the rules of conduct and protection regimes, the manner of managing the Park, surveillance in the Park and other practices related to the purpose of this Decree.

(2) This Decree also sets out development guidelines in the Park, which respect the principle of sustainable development.

## II. AREA OF THE PARK AND OF THE NARROW PROTECTED AREAS

### **Article 3 (Narrow Protected Areas)**

The following narrow protected areas are defined for the Park:

- Natural value Strunjan cliffs, Ref. No. 4802, with part of the sea and the immediate hinterland is designated as Strunjan Nature Reserve (hereinafter: Strunjan NR);
- Natural value Strunjan-Stjuža, ev. No. 2846, and the potential special area of conservation of Strunjan salt pans with Stjuža, ID No. SI3000238, is determined as Strunjan-Stjuža Nature Reserve (hereinafter: Strunjan-Stjuža NR);
- Natural value Strunjan Pine Avenue, ev. No. 141, is determined as Pine Avenue Natural Monument (hereinafter: Pine Avenue NM).

### **Article 4 (Boundaries of the Park and the Narrow Protected Areas)**

(1) The boundaries of the Park and the narrow protected areas from the paragraph above are defined on the national topographic map at the scale of 1:10,000 and are detailed in the digital cadastral map precisely for each plot.

(2) The records of the display of the boundaries referred to in the preceding paragraph are kept by the Ministry responsible for nature conservation (hereinafter: the Ministry), the local communities in the area of the Park, and the Park Manager.

(3) The boundaries of the Park and the narrow protected area are also shown on the annexed map at a scale of 1:20,000, annexed as an integral part to this Decree.

(4) On the basis of data from the registry of natural values, the Ministry competent for land-surveying matters documents the area of the Park in the land cadastre database.

## III. DEVELOPMENT GUIDELINES

### **Article 5 (Development Guidelines)**

(1) The development guidelines, which contribute to sustainable development in the Park, relate to actions connected to projects, investments and the implementation of activities that are in line with the objectives of the Park, and which are based on the comparative advantages of the Park and allow for the economic, social and cultural development of local communities in the area of the Park and its inhabitants, and which strengthen the economic competitiveness of the area.

(2) In accordance with the Park's objectives, the Park promotes sustainable development, provides for new development opportunities for the inhabitants, and promotes activities which contribute to the preservation of nature, the integral preservation of the cultural heritage, the maintenance and conservation of the Park's typical landscapes, and an improvement in the state of the environment.

(3) The sustainable development referred to in Paragraphs one and two of this Article is achieved by:

- Promoting forms of activities that contribute to the conservation of biodiversity, and the protection of the natural values and landscape;
- Promoting the preservation of agricultural activity, which plays a decisive role in the conservation of the Park's typical landscapes and products that are traditionally present in the area;
- Promoting environmentally friendly tourism and recreation;
- Promoting and integrating the development of agricultural, tourism, recreational and other activities which, through the sustainable use of natural resources, the use of environmentally friendly technologies and methods in the management of natural resources, and in line with the protection of cultural heritage, enable new development opportunities for the inhabitants;
- Protecting natural heritage;
- Promoting the production of salt in the traditional manner and the related use of products (brine and fango);
- Using environmentally friendly technologies and methods in the management of natural resources so as to preserve their ecosystem value and renewability, and to preserve the habitats of plant and animal species, habitat types and natural values;
- Preserving and improving the existing landscape and settlement pattern;
- Means of spatial planning and the renovation of settlements and facilities so as to preserve the quality and characteristics of the landscape;
- Directing visits to and tours of the Park;
- Forming producer groups, by means of a special decision of the Council of the Institute at the proposal of the Director, with the purpose of marketing agricultural products and foodstuffs from quality schemes.

### **Article 6 (Actions)**

- Development policies are implemented in particular through the following actions:
- Providing for the participation of the population of the Park area in obtaining financial resources from various municipal, state and interstate funds;
  - Directing resources of local, state and international funds, institutions and organizations into protection and development projects, coordinated with the purpose of establishing a Park;
  - Establishing a public utility infrastructure in the Park area;
  - Allowing the integration of agricultural, tourism, and salt-making activities and the related use of products, fishing activities and cultural heritage protection activities;
  - Providing professional help and education, and raising awareness of the inhabitants of the Park.

## IV. PROTECTION REGIMES AND RULES OF CONDUCT

### 4.1. Protection regimes

#### **Article 7 (Protection Regimes in the Park)**

(1) No interventions, activities or actions may be carried out in the Park to the extent and in a manner that could jeopardize the protection of the Park's objectives or adversely affect the natural values to such an extent as to substantially alter those

characteristics that are important for their preservation, biodiversity and landscape diversity in the Park, and jeopardize its ecological, biotic or landscape value. In particular it is not permitted to:

1. Impair water or soil quality;
2. Uncontrollably discharge or dispose of technological or urban waste water, liquid waste or other harmful liquid substances;
3. Dispose of or discharge waste;
4. Destroy or damage, in accordance with the Management Plan, nesting areas and other important sites in habitats where animals of wild species dwell, feed or reproduce;
5. Drive motor vehicles off state and local roads, with the exception of the inhabitants, owners and tenants of land, or park outside the designated spots in accordance with the Management Plan;
6. Carry out military activities.

(2) For the purpose of preserving the landscape in accordance with the Ordinances on the declaration of Landscape Park Strunjan of the municipalities of Izola and Piran (Official publication of the municipalities of Ilirska Bistrica, Izola, Koper, Piran, Postojna and Sežana, No. 3/90 and 6/90 – corr. and 5/90, 26/90 and 16/92) it is also not permitted in the Park to:

1. Carry out interventions in space and activities that could alter the Park's typical settlement and landscape patterns, or landscape elements, and which are contrary to the legal arrangements for the protection of cultural heritage;
2. Build or renovate works that are not in accordance with the architectural typology in the Park and which could change the identity of the landscape of the Strunjan peninsula, including the typical vistas and building dimensions of existing dominant landmarks, and which are contrary to the legal protocols for the protection of cultural heritage.

## **Article 8 (Protection Regimes in Strunjan-Stjuža NR)**

(1) In addition to the prohibitions in the preceding Article, in Strunjan-Stjuža NR it is also prohibited to:

1. Alter the water regime except for the protection of natural values, the preservation of biodiversity, or ecological or other justifiable reasons;
2. Destroy, damage or remove the microbial mat covering the bottom of salt-water pools, or the facilities and installations intended for the implementation of traditional salt-making (hereinafter: the Infrastructure);
3. Carry out earthworks or construction works, except for the activities referred to in Articles 11 and 12 of this Decree;
4. Set up power lines;
5. Place advertising or other boards, signals or luminous signs, except for the purposes of marking and presenting the Park;
6. Change the existing structures of the bottom of the lagoon, except for the protection of natural values and the preservation of biodiversity, or ecological or other justifiable reasons;
7. Use artificial light on animals, their housing, shelters or other important parts of their habitat;
8. Use natural resources for commercial purposes, other than salt production, which is carried out here in a traditional manner (hereinafter: traditional salt production);
9. Fish or carry out fishery measures and cultivate marine animals (mariculture);
10. Take plants and animals of wild species from nature;
11. Organize public gatherings or public events that could endanger the favourable state of habitat types and habitat species;
12. Stay contrary to the prescribed conditions for visiting and staying in the Park;

13. Camp;
14. Anchor any vessel or use motor-powered boats, except in areas designated by the Management Plan;
15. Set anything on fire or make fires.

(2) Notwithstanding point 10 of the preceding Paragraph, it is allowed to take from nature plants and animals of wild species for scientific, research or educational purposes, upon prior consent of the Institute of the Republic of Slovenia for Nature Conservation (hereinafter: the Institute).

(3) The opinion on the endangerment in cases referred to in point 11 of the first Paragraph of this Article is provided by the Institute.

(4) In Strunjan-Stjuža NR it is allowed to use motor-powered vehicles and boats in accordance with the conditions set out in the Park's Management Plan.

### **Article 9 (Protection Regime in Strunjan NR)**

(1) In addition to the prohibitions from Article 7 herein, in Strunjan NR it is also prohibited to:

1. Cause noise, explosions or vibrations;
2. Excavate, crush or break rocks or petrifications;
3. Make new paths between the seashore and the cliff-top, or climb the cliff walls;
4. Carry out earthworks, change the characteristics of the sites, construct works, including simple works, or interfere in a way that would prevent, modify or interrupt natural processes, e.g. installing protective nets, walls;
5. Set up power lines;
6. Place advertising or other boards, signals or luminous signs, except for the purposes of marking and presenting the Park;
7. Change the existing structures of the sea floor;
8. Use artificial light on animals, their housing, shelters or other important parts of their habitat;
9. Collect, dig out, burn, damage or break outdoor plants or destroy vegetation stands, except for the protection of natural values and the preservation of biodiversity, or ecological or other justifiable reasons;
10. Hunt game;
11. Carry out fishery measures or cultivate marine animals (mariculture);
12. Carry out non-commercial fishing, with the exception of fishing with a trolling line;
13. Carry out commercial fishing, except in the periods from 1 April to 1 June and from 1 October to 1 December, in accordance with the Management Plan;
14. Stay contrary to the prescribed conditions for visiting and staying in the Park;
15. Camp;
16. Organize public gatherings or public events that could endanger the favourable state of habitat types and habitat species;
17. Go paragliding or hang-gliding;
18. Set anything on fire or make fires.

(2) The opinion on the endangerment in cases referred to in point 16 of the preceding Paragraph is provided by the Institute.

(3) Notwithstanding point 12 of Paragraph one of this Article, the Minister competent for fisheries, upon consent of the Minister competent for nature conservation (hereinafter the: Minister), in the event of the appearance of winter shoaling, may allow

commercial fishing in the area of Strunjan NR overlapping with the area of the Strunjan fishing reserve.

(4) In addition to the prohibition set out in Paragraph one of this Article, in the central part of Strunjan NR, which is marked on the map from Paragraph one of Article 4 herein, it is also prohibited to:

1. Disturb, kill or take animals of wild species and their developing forms from nature;
2. Carry out commercial fishing;
3. Carry out autonomous diving, except for the needs of the protection of natural values and the preservation of biodiversity;
4. Navigate motor-powered boats or anchor.

(5) Notwithstanding point 1 of the preceding Paragraph, it is allowed to take from nature animals of wild species and their developing forms for scientific, research and educational purposes, upon prior consent of the Institute.

(6) In Strunjan NR it is allowed to use motor-powered vehicles and boats in accordance with the conditions set out in the Park's Management Plan.

### **Article 10 (Protection Regime in Pine Avenue NM)**

(1) In addition to the prohibitions set out in Article 7 herein, in Pine Avenue NM it is also prohibited to:

1. Break, chop, trim or damage branches, leaves, trunks, bark or roots, unless it involves a regular professional pruning of shoots or interventions during tree restoration;
2. Change the living conditions of the site, e.g. remove the soil, uncover the roots, cover the trunks or the surface above the roots, or release harmful liquid or gaseous substances on the site;
3. Dispose of waste;
4. Install devices or construct works, including simple works;
5. Hang, affix or place foreign bodies, such as posters, notices, lamps, carriers of wire lines, boards or cabinets of antennas to the trunks, roots or branches of trees;
6. Install electric or other air or ground line wires through the trees or through their root systems.

(2) Notwithstanding point 4 of the preceding Paragraph, in the event that there are no other spatial possibilities, it is allowed to set up simple works or carry out work related to works and their associated land in accordance with the regulations in the field of construction of works, such as scaffolding, kiosks, memorials, wells, lamps and benches, at an appropriate distance from the trees and in such a manner that they are not in any way affected and that their visual image is only minimally changed.

### **Article 11 (Exceptions for the Park Manager and Operators of Environmental Protection Tasks)**

(1) Notwithstanding the prohibitions set out in Articles from 7 to 10 herein, the Park manager may, in accordance with the Management Plan:

- Use devices, vehicles and motor-powered boats required for the management, surveillance and monitoring of the situation in the Park;
- Construct works and install devices aimed at protecting and presenting natural values, preserving biodiversity and landscape diversity, and visiting and experiencing the Park (hereinafter: infrastructure in the Park).

(2) Notwithstanding the prohibitions set out in Articles from 7 to 10 herein, it is allowed to carry out work in the Park for the implementation of individual environmental protection tasks in accordance with the Management Plan.

### **Article 12 (Other Exceptions)**

(1) Notwithstanding the prohibitions set out in Articles from 7 to 10 herein, it is allowed to carry out in the Park public utility services of water management and emergency defensive actions, and implement protection, rescue and relief in the event of natural and other disasters.

(2) The tasks of the state public utility service of water management are defined in the annual programme for their implementation, in the preparation of which the purpose and protection objectives of this Decree and the Management Plan of the Park are taken into account and are implemented in accordance with Article 15 herein, and according to a schedule which must be harmonized with the manager's schedule of the annual programme of work.

(3) Notwithstanding the prohibitions set out in Articles from 7 to 10 herein, in accordance with the Management Plan it is allowed to construct works and set up facilities intended for traditional salt-making and related product use in the Park, as well as to restore the moorings at the entrance to the lagoon and the Strunjan river (Roja).

(4) Notwithstanding point 3 of Paragraph one of Article 8 herein, it is allowed to carry out earthworks and construction work in relation to the residential works at Strunjan 152 and Strunjan 153.

## 4.2. Rules of Conduct

### **Article 13 (Environmental Protection Tasks)**

In accordance with the Management Plan, it is allowed to carry out the following environmental protection tasks:

- Care of the preservation or establishment of such uses of land, and the performance of activities and interventions, that protect natural values and biodiversity;
- Care of the conservation of the Park's typical mosaic landscape;
- Construction, renovation and maintenance of infrastructure for visits to the Park;
- At Strunjan-Stjuža NR – maintenance of the water regime which preserves the diversity of habitats of plant and animal species typical of salty, brackish or fresh water wetlands, and the renovation and maintenance of the salt production infrastructure in such a way as to protect natural values and preserve biodiversity;
- At Pine Avenue NM, to regularly maintain the avenue;
- Other tasks which help preserve natural values and preserve biodiversity and landscape diversity, and which are defined in the Management Plan of the Park.

**Article 14**  
**(Intended Purpose of the Narrow Protected Areas in the Park)**

(1) The primary intended purpose of the area of Strunjan NR is protection. Strunjan NR allows for the performance of activities and provides for such a use that protects natural values, preserves natural processes and the diversity of habitat types, and the habitats of plant and animal species and communities.

(2) Traditional salt production is carried out at Strunjan-Stjuža NR in order to protect natural values and preserve a favourable condition of habitat types and habitats of endangered plant and animal species, while other activities are carried out only if they do not obstruct the protection of habitat types, populations of endangered plant and animal species or traditional salt production.

(3) At Pine Avenue NM, activities are carried out and use is made so as to ensure the preservation of the entire avenue and the individual trees.

**Article 15**  
**(Implementation of Interventions and Activities)**

(1) Each intervention, activity and action in the Park must be implemented to the extent and in a manner that least jeopardizes the natural balance and the condition of natural values in the Park.

(2) The following interventions or activities must be reported to the manager of the Park in advance:

- Introduction of a new activity, for example an increase in tourist services, introduction of a new tourist service;
- Taking of plants or animals of wild species or their developing forms from nature in accordance with Article 8 and 9 herein, and setting up works under Paragraph 2 of Article 10 herein;
- Interventions on the coast and coastal land.

(3) In the preparation of programmes for implementation, and in the implementation of activities and interventions under Articles 11 and 12 herein, it is necessary to consider the implementation of environmental-protection tasks stipulated by the law and this Decree, and harmonize them with the measures for the prevention of harmful effects in the Park and protection guidelines for the sustainable development of activities as an integral part of the Park's Management Plan.

**Article 16**  
**(Environmental Protection Guidelines)**

The content of environmental protection guidelines for the Park, which are taken into account in the spatial planning and the use of environmental resources, is determined on the basis of this Decree, the Park's Management Plan, and rules from the field of nature conservation, which regulate the protection of natural values, endangered and protected plant and animal species, and the conservation of ecosystems.

**Article 17**  
**(Environmental Protection Consent)**

(1) In order to construct works in the Park it is necessary to obtain nature conservation conditions and a natural conservation consent in accordance with the rules of work construction and nature conservation.

(2) In order to construct simple works in Strunjan NR, Strunjan-Stjuža NR and Pine Avenue NM it is necessary to obtain an environmental protection consent.

(3) Notwithstanding the provision of Paragraph one of this Article, it is not necessary to obtain an environmental protection consent for the built-up area of the Park where there are no narrow protected areas, for the reconstruction of works, replacement construction or the removal of works, and for works for own purposes, with the exception of swimming pools and fences, if the impacts of construction do not go beyond the building plot of the works to which the construction relates.

**V. MANAGEMENT**

**Article 18**  
**(Park Management)**

(1) The Government of the Republic of Slovenia (hereinafter: the Government) established a Public Institute for the management of the Park by means of a separate Act, in which it arranged status law and organizational issues in relation to its operations.

(2) The Public Institute, within the public utility services of nature conservation in the Park, carries out protection, expert, surveillance and management tasks.

**Article 19**  
**(Public Institute's Bodies)**

(1) The Public Institute has the following bodies:

- Institute's Council,
- Scientific Council, and
- Director.

(2) The Institute's Council, which is the highest management body, consists of representatives from local self-government communities from the Park area (hereinafter: the Park's local communities).

(3) A more detailed composition of the bodies, the manner of appointment of members, and other issues are governed by the Articles of Association of the Public Institute.

**Article 19a**  
**(Tasks of the Public Institute)**

(1) Within the public service of nature conservation, the Public Institute carries out the following tasks:

1. Prepares the proposal of the Park's Management Plan;

2. Prepares annual work programmes on the basis of the Management Plan and carries out or provides for the implementation of certain tasks and actions of nature conservation;
3. Collaborates with the Park's local communities in the achievement of the Park's objectives;
4. Monitors and analyses the situation of natural values, biodiversity and landscape diversity and the environment in the Park;
5. Provides for the implementation of development and protection policies and protection regimes;
6. Cooperates with the Institute in the preparation of environmental protection guidelines, environmental protection opinions, environmental protection conditions and environmental protection consents, as well as other opinions, consents and professional literature for the part relating to the Park;
7. Implements actions of nature protection in the Park, including actions of contractual protection and custody in accordance with the rules governing nature conservation;
8. Provides for the implementation or implements tasks of environmental protection;
9. Collaborates with administrative authorities and organizations which, on the basis of rules, implement tasks of protection, management or use in legally defined areas;
10. Collaborates with inspection services;
11. Collaborates with non-governmental organizations;
12. Collaborates with owners, tenants and other land users in the Park, and provides professional help and advice for them;
13. Collaborates in the preparation of programmes, plans and other development and protection documents for the part relating to the Park;
14. Coordinates and monitors research and development tasks related to the Park;
15. Collaborates in the implementation of or implements international projects relating to the Park;
16. Provides for the presentation of the Park and public awareness and education about the Park;
17. Provides access to information on the Park and keeps an information network of the Park;
18. Plans, builds and maintains infrastructure in the Park;
19. Takes visitors on a tour of the Park;
20. Carries out other tasks in the context of protection and development in accordance with this Decree.

(2) The Public Institute also carries out as public service tasks relating to the management of state-owned real estate in the Park and serves for the purpose of the Park, including the management of state-owned mooring places in the Park.

(3) The Government defines the real estate from the preceding Paragraph with a resolution.

(4) Detailed tasks relating to the extent of management of state-owned real estate are defined in the Articles of Association of the Public Institute.

### **Article 19b (Public Authorization)**

On the basis of public authorization, the Public Institute carries out the following tasks:

- Carries out direct surveillance in the Park in accordance with the rules governing nature conservation;
- Manages databases relating to the Park.

**Article 20**  
**(Management Plan)**

(1) The management of the Park is implemented on the basis of a ten-year Park Management Plan.

(2) The Management Plan of the Park must be taken into consideration in the spatial planning, performance of activities, and management, governance and use of environmental resources in the Park, the preservation of landscape diversity, and the implementation of commercial and other public services in the Park.

**Article 21**  
**(Content of the Management Plan)**

(1) The essential elements of the Park's Management Plan, which are provided by the law governing nature conservation, are structured so as to show:

- An assessment of the situation in the Park which covers the situation according to each individual field, namely: nature conservation, use and activities in the area, and the industrial, economic and social structure of the Park;
- The medium-term and short-term operational objectives of the Park management resulting from the purpose of establishing the Park;
- Direct and indirect actions to achieve the set objectives that include the definition of the content of the manager's tasks in relation to the direct management of the Park, and tasks resulting from the definition of actions which are carried out on the basis of other rules and which indirectly impact the achievement of the objective of establishing the Park;
- The spatial arrangement of protection and development contents of the Park;
- Programmes of implementation of the Park's Management Plan by prioritizing the implementation of measures and financial evaluation.

(2) The Management Plan also defines in detail:

- The work programme of public utility services referred to in Article 12 herein, which defines in detail the tasks and schedules of their implementation;
- The programme of reconstruction and maintenance of infrastructure facilities in the Park according to their purpose;
- The coordination of management and governance programmes in the narrow protected areas;
- The research and monitoring programme;
- The conditions for visiting and the conditions for the use of vehicles and boats;
- The spatial arrangement of protection and development content in cartographic form;
- The format of the report on the implementation of the Park's Management Plan from the preceding Article;
- The programme of implementation of direct surveillance.

**Article 21a**  
**(Preparation, Adoption and Monitoring of the Implementation of the Management Plan)**

(1) The Management Plan is professionally prepared by the Public Institute in collaboration with the Institute. Other professional organizations, which on the basis of rules carry out the tasks of protection in legally defined areas, as well as the Park's local communities and representatives of non-governmental organizations, may also participate in the preparation of the Management Plan.

(2) The Public Institute prepares the Management Plan on the basis of this Decree and the rules governing nature conservation, and by taking into account the opinions, views and comments from the public hearing, the views of the Park's local communities and organizations referred to in the previous Paragraph.

(3) The Management Plan is adopted by the Government at the proposal of the Ministry.

(4) Each year, the Public Institute reports to the Ministry on the implementation of the Management Plan.

(5) In the event that, when monitoring the implementation of the Management Plan, the Public Institute establishes that it needs to be adapted to a changed circumstance, it prepares amendments to the Management Plan, which are adopted in the same manner as the Management Plan.

## **Article 22 (Annual Programme of Work)**

(1) On the basis of the Management Plan the Public Institute adopts a financially evaluated annual programme of work.

(2) The annual programme of work defines in detail the time schedule for the implementation of works and tasks from the Park's Management Plan so as to take into account for each individual type of such work and tasks the most favourable period in terms of the expected situation in the Park and the financial resources for the implementation of activities and tasks in the Park.

(3) **(Ceased to be in force)**

(4) **(Deleted)**

## **Article 23 (Deleted)**

## VI. FINANCING

### **Article 24 (Funds)**

(1) The Public Institute obtains financial resources for the management of the Park:

- From the national budget;
- From entrance fees, grants and donations;
- From assets acquired through real estate management;
- By the revenue from the sale of goods and services which it carries out;
- From various international aid programmes;
- By funds acquired on the basis of the co-financing of programmes and projects that are in line with the objectives of the Park, from the funds of local, state and international funds, institutions or other organizations;
- From other sources.

(2) The public institute may also acquire funds from the budgets of local self-government communities in accordance with their programmes and the Park's adopted Management Plan.

(3) Part of the funds acquired in the manner described in Paragraph one of this Article may be allocated to the implementation of the development guidelines of the Park in accordance with the Park's Management Plan.

**Article 25  
(Deleted)**

VII. SURVEILLANCE

**Article 26  
(Surveillance Authorities)**

(1) Inspection of the implementation of this Decree is carried out by inspectors competent for nature conservation, and inspectors for fisheries, and within the framework of their jurisdiction, also by the Slovenian Maritime Administration.

(2) Direct surveillance in the Park is provided by the Park manager in accordance with the rules of nature conservation.

---
