COMMENTS by the Technical Advisory Commission

The Management Body presented to the TAC the activities carried out in the MPA in order to reach the conservation and management goals and fulfill the SPAMI criteria. The TAC gave advice on some statements of single sections of the Format for the Periodic Review, specially concerning the need of enhancing the monitoring of the effects of the regulations of professional and leisure fisheries on fish assemblages and to find ways and means to improve the selectivity of fishing gears more in line with this kind of MPA.

A positive judgement is given on the foreseen control system, based on the use of infrared automatic cameras, useful to fight illegal activities i.e. for instance date mussels harvesting.

CONCLUSION

The TAC changed slightly the values given by the Management Body. In spite of the above the TAC is of the opinion that the Punta Campanella MPA fulfills the SPAMI criteria set up in the SPA & BD Protocol.

RECOMMENDATIONS

The TAC appreciated the efforts and the actual results obtained and presented by the Management body.

In order to further improve the efficiency of the management of the area the TAC suggests:

- the set-up a specific monitoring of the catches of professional and leisure fishing;
- to further reduce the impact of leisure boats anchoring by installing additional moorings.

The TAC recommends to the RAC /SPA to improve the collaboration among SPAMIs to facilitate the exchange of experiences.
